

MOHAMMAD ARSHIL SIDDIQI

STUDENT · DEVELOPER · AI ENTHUSIAST

things I've built

Projects:

Pretext Kotlin Library

Open Source · Library

What I built

A Kotlin/JVM text-layout engine built around prepared measurements and fast reusable layout.

Why

I wanted a layout system that could do more interesting things with text, including dynamic obstacles.

What I learned

Thinking about layout as preparation + cheap reuse changed how I approach performance-sensitive UI work.

- <https://github.com/Coderarshil/pretext-kotlin-library/releases/tag/v1.0.0>

MiniCPM-V Apps

Contribution · Android

What I built

An English-localized, UI/UX-refined Android experience based on OpenBMB MiniCPM-V Apps.

Why

I wanted the app to feel cleaner, softer and more at home on a modern Android device.

What I learned

Small visual decisions and usability refinements can completely change how a technical product feels.

- <https://github.com/Coderarshil/MiniCPM-V-Apps/releases/tag/v1.0.0>

Mosquito Risk

Open Source · Computational Project

What I built

A climate-informed mosquito risk assessment prototype using weather data and environmental modeling.

Why

I wanted to turn environmental variables into something understandable and useful through computation.

What I learned

Mixing APIs, mathematical relationships, geospatial thinking and ML ideas is messy — and fun.

En/Hi

Who I am

I'm Arshil, an 18-year-old student and creative developer who enjoys turning ideas into things people can actually use. I often teach myself what I need along the way. I'm especially drawn to problems that don't have obvious answers — the kind that make me curious enough to build, experiment, and find my own solution.

EDUCATION:

- Lucknow Christian College
- Class XII · Uttar Pradesh Board
- Expected 2027

TEACHER RECOMMENDATIONS:

Dr. Ravil Das, Ph.D. · Science & Hindi Teacher

"Arshil is an exceptionally curious and resilient learner who consistently connects classroom knowledge with real-world problems. His work on the Mosquito Risk Calculator demonstrated thoughtful reasoning, environmental awareness, and a genuine desire to solve meaningful problems. He is not driven by marks alone, but by curiosity, inquiry, and meaning."

Ms. Raza · English Language Teacher

"Arshil stands out for his imagination, voice, and depth of thought. His storytelling, writing, presentations, and ability to engage others reflect strong communication and empathy. He consistently supports his peers and combines his love for language with real-world impact, demonstrating the kind of leadership and expression that can contribute meaningfully on a global platform."
